

Project Operations & Billing Dashboard

Overview

Excel-based dashboard simulating project operations including job tracking, billing, document control, inventory, and workflow management.

Problem

Project teams face scattered data, delayed billing, poor document visibility, and lack of centralized tracking across the project lifecycle.

Solution

Developed a structured Excel dashboard integrating project setup, billing tracking, document logs, inventory monitoring, and workflow pipelines with automation.

Key Features

Feature	Description
KPI Dashboard	Project health, budget tracking, status
Billing Tracker	Invoice aging, payments, change orders
Document Control	RFIs and submittals tracking
Inventory Tracker	Materials and low-stock alerts
Workflow Pipeline	Stage tracking from setup to closeout

Business Impact

Improves project visibility, reduces missed billing, enhances coordination, and supports data-driven decision making.

Tools Used

Microsoft Excel, formulas, conditional formatting, dashboards, workflow design.
